

# 1000-DR Digital Conversion Package

Turn your PC-1000 into a state-of-the-art direct-digital panoramic x-ray system

Choosing the digital panoramic x-ray solution that's right for your practice is an important decision. Key considerations include enhancing patient care, increasing profitability and implementing the solution easily and affordably.

Film drum is replaced with Cadmium Telluride direct-digital sensor.

As a valued customer, you helped make the Panoramic PC-1000 the best-selling panoramic x-ray machine in the nation. With the PC-1000, you already have the foundation in place for converting to direct-digital capture.

The 1000-DR Conversion Package transforms your PC-1000 into a state-of-the-art direct-digital system – at a fraction of what a new digital unit might cost.

## 1000-DR Conversion Package Highlights:

- Cutting edge capture technology provides extraordinarily sharp images that can be magnified and enhanced.
- Image data allows you to selectively enhance different layers of the patient's image.
- Simple modular conversion takes just a few hours.
- Familiar functions and patient procedures reduce learning curves and potential for error.
- Faster process improves patient experience and capacity.
- Integration with your computer network and practice management software streamlines operations.
- Legendary durability backed by the industry's longest and most inclusive warranty.

# 1000-DR Digital Conversion Package

*For dental professionals already using the PC-1000, the 1000-DR Package offers the quality, speed and ease that make it the right digital solution for your practice.*

## The 1000-DR digital conversion package includes:

- 1000-DR Cadmium Telluride (CdTe) digital sensor.
- Dell computer system and diagnostic software.
- Same-day training (in-office or web and phone).
- Integration with your computer network and image and practice management software.
- Single source of support, service and accountability.

## Quality

- Improved diagnostics.
  - **CdTe technology** captures images with up to 300% more clarity than other digital technologies and reduces the spinal column shadow typical in film x-rays.
  - **Diagnostic software** provides multiple magnification options and further image enhancement.
  - **Image data** allows selective enhancement of different image layers, aiding diagnosis.
- Superior computer components.
  - **Dell Minitower** computer offers ample processing power and dependability.
  - **Dell 17" Flat Panel Monitor** provides the screen resolution you need for effective diagnostics.
- Exceptional service and technical support.
  - **A nationwide network of trained field service technicians** to ensure your needs are promptly met.
  - **Free telephone and internet support** from knowledgeable factory service technicians.
- Legendary durability backed by **the industry's longest and most inclusive warranty.**

## Speed

- **Conversion process**, including training, takes just a few hours.
- **Familiar functions and patient procedures** mean your staff already has many of the skills needed.
- **Images immediately available** for diagnostics/patient consultation.
- Patient experience and capacity are improved by a **faster overall process.**
- **Insurance payments** are often received quicker when claims are submitted electronically.

## Ease

- **Integration** with computer network and practice management software simplifies front office procedures and enhances patient consultation.
- **Automatic image optimization** provides superb images with one press of the button – little or no need for post-capture adjustments.
